DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-37, 47-49 and 55, drawn to a method of generating hearing assessment signals for performing a hearing test, classified in class 600, subclass 559.
- II. Claims 38-46, 50-54 and 56-59, drawn to a method of using web pages to conduct a hearing test, classified in class 600, subclass 300.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a web server is not required. The subcombination has separate utility such as remote hearing tests where web pages are used to communicate with the patient.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Should Applicant elect Invention I, this invention contains claims directed to the following patentably distinct species of the claimed invention: A) a method of testing

hearing with patient indication of an audible signal (claims 13-17, 31-36 and 47-49); and B) a method of testing hearing with pressure/otoacoustic measurement (claims 11 and 55) with claims 1-10, 12, and 18-30 generic to both species.

Should Applicant elect Invention II, this invention contains claims directed to the following patentably distinct species of the claimed invention: A) controlling operation of a hearing test with a server/client arrangement (claims 38-46 and 50-54); B) controlling an electrophysiological auditory evaluation test using otoacoustic emissions (claim 56); and C) a hearing test with a web server configured to host socket connections (claims 57-59).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
